"&quot;Rolf Wallin's Move profiles richly contrasting pieces written in the last decade, kaleidoscopic in the style of leading Finnish composer Magnus Lindberg. Solve et coagula has already been recorded by chamber ensemble Cikada (see The Wire 169). It's a gloriously kinetic exploration of sound masses that mimic the swing of a crazy pendulum. A similar effect is found in Ning, performed by BIT 20 from Bergen. The percussion piece Stonewave is the most mathematical in concept. But though most pieces are derived from fractals as found in chaos theory, the results are much more immediately approachable than Xenakis' stochastic compositions. An outstanding release.&quot; Wired, March 1999
